ALL-DAY CLASSROOM

... the flexible utilization of the classroom

Frontal teaching:

With interactive blackboard. Cupboards and partition screens are placed in a space-saving manner.

An all-day school has the target to take care of and accommodate students during the major part of the day. Spare time and lessons are interwoven and make up a unit.

There are also provisions for homework assistance or care after class.

Since the afternoons are mostly more easy-going, the cooperation between students and teachers is especially enhanced. The classroom community spends more time together and social life is positively influenced by this.

The students are also given the possibility to get familiar with additional options and use them. Otherwise there would be no access to these.

Notwithstanding afternoons are an integral part of the

school procedures – with clearly and unmistakably defined educational goals – and does not only consist of a care programme.

Schools must be made fit for whole-day operation, if children want to feel good. Apart from learning, study and play communication is an important factor of afternoon care. To relax, chill and exchange experiences students like to retire to communication furniture which should be as comfortable as lounge furniture. Mayr School Furniture has developed various cushion elements for a comfortable classroom which can be combined individually. Thus comfortable sitting and lying becomes easy. In addition the couch elements are very robust. Simultaneously the communication furniture can also be used during talks, discussions and teamwork in class.

Group work, free work, or individual instruction:

Mobile cupboards and partition screens separate the different areas. Couch elements offer the necessary relaxation.

More and more schools consider the whole classroom as a dynamic unit.

When furnishing the general instruction rooms furniture can be exchanged quickly if required or even regrouped. They use furniture systems which enhance the physical and mental dynamism at school through a flexible arrangement of the student work desks. Particularly all-day schools use the flexible furniture in their classrooms. Thus they can be rearranged quickly if required for frontal teaching, group work or homework assistance and individual instruction in the afternoon.

MOVE - TABLE *Penta*

variable, light and individually combinable

The **Move-Table Penta** can be rearranged fast and easily to create the changing conditions for group work, individual study or plenum work. For each learning situation an individual and tailor-made recreation is possible. Thanks to the particularly developed desk shape a kaleidoscope of groupings is possible. The arrangement of the desk bases enables stacking up to 5 desks.

Framework: Four-base metal framework of powder-coated steel tube, apron (FR 30/20/2 mm), base cross section Ø 38/2 mm, desk heights: sz. 4, 5, 6.

Floor gliders: The floor gliding surface is felt, optionally with a double castor with soft running surface.

Desktop designs: 12 mm compact top (high pressure plastic laminate) or 19 mm melamine resin coated chipboard with 2 mm solid plastic edge

Move-Table PENTA

Desk heights: sz. 4, 5, 6

1860C	89,6/68,6/75 cm	compact desktop 12 mm
1860M	89,6/68,6/76 cm	desktop 19 mm melamine

Move-Table PENTA

Desk heights: sz. 4, 5, 6, with double castor

1861C	89,6/68,6/75 cm	compact desktop 12 mm
1861M	89,6/68,6/76 cm	desktop 19 mm melamine

Additional equipment:

HVE 38	HVE 38 surcharge HV-insert for table (RR Ø 38/2 mm) per leg Adjustment range ± 5 cm, (not possible for tables with castors!)

Planning examples

Whether frontal teaching or group work, free work, or individual instruction:

Teaching in the 21st century requires a multifunctional facility, which can be modified in the short term and supports diverse learning situations.

Rigid seating arrangements are a thing of the past. A contemporary learning space should create an atmosphere in which students and teachers feel comfortable.

The **Move-Table Penta** can be rearranged fast and easily to create the changing conditions for group work, individual study or plenum work. For each learning situation an individual and tailor-made recreation is possible.

Thanks to the particularly developed desk shape a kaleidoscope of groupings is possible. The arrangement of the desk bases enables stacking up to 5 desks.

Room size: 62 m²
 7,3 m x 8,5 m
 24 student workplaces

MOVE-BOX *Penta*

Mobile cupboard, variable and individually combinable

The **Move-Box Penta** can be fast and easily rearranged and thereby is the perfect completion for all flexible room concepts. The basic structure is derived from the Move-Desk PENTA and allows the same variety of groupings. For each learning situation an individual and needs-oriented rearrangement is possible.

The cupboard corpus is divided by a central shelf at desktop level (norm size 6 = 76 cm). The upper cupboard area has file height and is prepared for the incorporation of guide rails for storage boxes, the lower cupboard area has one fixed and two adjustable shelves. The bottom and top plate are 25 mm thick, all edges are of 2 mm solid plastic and rounded.

At four corners the base elements are of RAL 9006 (white aluminium) powder coated steel tube (Ø 38/2 mm) across the whole cupboard height, below with metal jacks and four double castors Ø 7,5 cm, two double castors with locking device.

69300

Pentagon low cupboard mobile for storage boxes and files

69300 89,3/63,2/112 cm a central head for the mounting of guide rails prepared for three pieces storage boxes BOX1F, one fixed and two adjustable shelves

Additional equipment:

Storage boxes incl. guide rails of synthetic, grip recess;
 Colours: red, yellow, orange, blue, green, lemon green or transparent

BOX 1F 31,2/37,7/7,5 cm (per pc)

RELAX - PENTA

Cushion stool

Subconstruction:

Consisting of and board material and solid wood.
 Synthetic floor gliders with felt gliding surface.

Upholstering:

High-quality foam (RG 50) finished in a flame-retarding way.
 Multi-layer structure with various hardness grades,
 total 70 mm thick.

Cover:

Synthetic leather in low inflammable finishing, very durable and washable, quilted with synthetic down fleece.

Size:

89 x 60 cm, seating height 43 cm

RELAX - PENTA Cushion stool
